## **(To continue our nightmare travel scenario series) Planning on traveling overseas?**

**Better get your passport early as the already swamped Passport Agency would drastically slow down in the processing of your passport.**

**Also plan to be very patient when reentering the United States. The Customs and Border Patrol will have to get rid of 1,600 officers who work at our airports and ports of entry which would significantly increase wait times at our nation's already congested land ports of entry.**

**Plus how safe will that plane you are on be after sequestration cuts? Well, the reductions to the Transportation Security Administration's (TSA) air cargo program would stop progress on the ability to screen 100% of air cargo on passenger aircraft and virtually stop all new international cargo screening efforts in order to keep up with domestic screening.**

**Across-the-board cuts to domestic spending are NOT the answer!**
