

## Since this is a new year, it is time for a resolution. Let's NOT do nothing.....

### And have this happen in March 2013\*:

- Furloughing 800,000 Defense civilian workers and seriously doing great harm to our ability to provide a strong defense for our country.
- Furloughing approximately 25,000 teachers nationwide and thereby impacting our children's ability to learn and excel.
- Furloughing 2,200 air traffic controllers and thus making air travel more dangerous and less reliable.
- Five-week furloughs could be initiated for FBI employees and/or 7,500 jobs could be cut, damaging our nation's security.
- Cutting 24,500 jobs from Homeland Security which could lead to much longer security lines at airports.
- Federal courts might be forced to furlough 20,000 employees for 16 days, leading to severe delays in cases and trials.
